

# AM I IN THE RIGHT JOB?

How to find out if  
you are in the right field  
or career using BaZi

# JOEY YAP

# Are you in the right job?

In today's modern world, it is not an easy task to look for a job. But perhaps the real challenge is liking and staying in one. As the international job market deteriorates, we hear plenty of excuses and reasons for alarmingly high rate of unemployment; which include economic recessions, bottleneck effect of graduates' community and incompetence.

Try this:

**Go out.**

**Talk to someone... anyone actually,**

and ask them if they are doing what they like, if they are being paid for what they love doing, or if they want to do they are doing for the rest of their lives.

Chances are, they would probably confirm this: Doing the job you love is a rare occurrence; but getting paid well for doing it is even rarer.

# Key to the Right Career

Have you ever wondered how it would be like if you have a high-income career that you love and are passionate about? It would be like winning the lottery. But not everyone is lucky to achieve this feat. So what does it take to get and stay in a job that is right for you?

The answer is BaZi.

BaZi, a Chinese method of discovering your personality and how you can use it best to find the perfect job for you and eventually creating the life you want. Using simple and minute details like your birth date and time, BaZi is a tool to learn, discover and plan your life accordingly for the future.

It is very much similar to the commonly used personality tests such as Myerr-Briggs, DISC and Big 5. Just like these tests, BaZi has the capacity to accurately evaluate your character and deduce the perfect jobs that suit you to a tee. You may be asking, then why use BaZi?

# JOEY YAP

Although these tests have the same ultimate goals of deducing one's personality data, the difference lies in the technique they use in acquiring the data itself. Myerr-Briggs, DISC and Big 5 employ survey method to process and conclude one's character. This means, one is required to answer a series of questions and submit them in order to receive their results. This method would make it relatively easy to have the data manipulated and changed. On the other hand, BaZi only requires one's date and time of birth for a complete analysis of personality, life prospects and many more. This spells lesser chance of data manipulation.

This is how BaZi works. Each one of us have a different set of birth time and date combination. Therefore, the attributes that those details decipher are unique as well. The key to the right career and eventually your success is those details.

# JOEY YAP

# How do you see the world?

One of the important aspects of your personality according to a BaZi chart is the **Profile**. Using your Profile, you can derive your take towards the people and environment in your life. You can know how you react to situations, how you handle workplace issues and stress; and most importantly, which career your attributes suit most.

To be able to deduce your desirable career path, it is important to know what your personality is made of and how it reacts with the surroundings it is subjected upon. This is because it is impossible to survive the world, let alone a job, if you have no clue of which kind of people you attract or repel. Your characteristics will need to be compatible with your bosses, colleagues and clients. Your attributes and mindset decide if you will be able to endure what the job has to offer.

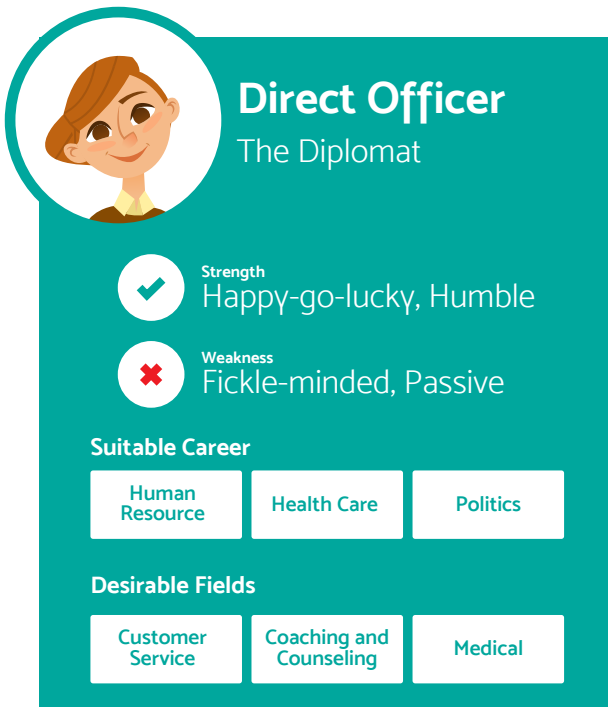

As mentioned, there are 10 Profiles altogether. Let's examine these before moving on to find yours.

To be able to deduce your desirable career path, it is important to know what your personality is made of and how it reacts with the surroundings it is subjected upon.

# Let's Talk About YOUR PROFILE

Using your Profile, you can derive your reactions and reflexes towards the people in your environment. You will know how to handle situations, workplace issues and stress; and most importantly, which career suits you the most.

Each chart comes with the full list of the ten Profiles, arranged from the highest percentage to the lowest according to your affinity to each. Ideally, the Profile at the topmost of the list in each chart is the chart owner's suitable Profile. For an example, if you have the Indirect Resource appearing as the first profile in your chart, then your Profile is the Indirect Resource.

For step-by-step instructions to plot your BaZi chart, please refer to page 13 of this eBook.

# JOEY YAP

Your Profile gives a clear picture on your ability to co-exist with others in your workplace; be it with people who are like you or people who are the polar opposite of your character. The information you have received in this eBook are, metaphorically speaking, the tip of the iceberg. There are more to it, and it also largely depends on how the other elements of your chart correspond to each other.

**Don't worry about the rest of the chart, we are only focusing on your profiles in this eBook. To know more, email us at [growrich@joeyyap.com](mailto:growrich@joeyyap.com)**
